Dear Hiring Manager,

I hope this message finds you well.

My name is **Kem Deth**, and I am currently pursuing a degree in Computer Science at the Royal University of Phnom Penh. I am writing to express my interest in any entry-level web development opportunities within your organization.

Although I may not have formal work experience, I have developed a strong foundation in front-end technologies including **HTML**, **CSS (with Bootstrap 5)**, **JavaScript**, and **Git/GitHub** through academic projects and self-learning. I have built responsive websites and small applications such as an **inventory management system** and a **mock e-commerce storefront**, which have helped me apply coding concepts in real scenarios and strengthened my ability to learn independently.

I am passionate about **clean, functional design** and always eager to improve and contribute to real-world projects. I am confident that my dedication, attention to detail, and commitment to learning would make me a valuable addition to your team.

I have attached my CV for your review. Thank you very much for considering my application. I would be happy to discuss how I can contribute and grow with your team.

Sincerely,
Kem Deth
