

Kem Deth
Computer Science Student | Aspiring Front-End
Developer
Phnom Penh, Cambodia

Dear Hiring Manager,

Welcome to my portfolio. This page serves as a public version of my cover letter, created to briefly introduce myself and provide an overview of my work.

I am a third-year Computer Science student at the Royal University of Phnom Penh with a strong interest in web development and IT systems. My technical skills include HTML, CSS, JavaScript, Bootstrap 5, and version control using Git and GitHub. I also have a basic understanding of backend concepts and enjoy learning new technologies through practical projects.

On this portfolio, you will find several projects I have developed, including responsive websites, a simple inventory management system, and a mock e-commerce platform. These projects demonstrate my ability to apply technical knowledge, solve problems, and build functional web applications.

Thank you for taking the time to review my work. I hope my portfolio gives you a clear view of my skills, motivation, and potential as a developer.

Sincerely,
Kem Deth
